

MTL Manual Trans Lube

A common complaint from BMW owners is poor shifting in cold weather. Red Line MTL is formulated for maximum load protection, while still maintaining the perfect friction coefficient, assuring you smooth shifting in all temperatures. Recommended by most transmission rebuilders. Satisfies all manual transmissions requiring: ATF, Motor oil, GL-1, GL-3, or GL-4 gear oils.

6 pack	
99015	\$49.95

Synthetic A.T.F.

Red Line synthetic A.T.F. will offer a much higher resistance to thermal break down. The superior stability allows high temperature operation without varnishing valves and clutches. Sticking valves and varnish build up is primary reason for premature automatic transmission failure.

A.T.F. 1 quart

Water Wetter

The best liquid for keeping your engine cool is not antifreeze. It's plain water. Unfortunately, anti-freeze is required because of its lower freezing point and higher boiling point. Tests have proven that using a 50% mix of antifreeze and water, with a 12 oz. treatment of Redline Water Wetter, can reduce your engine temperature by almost 10 degrees F.

SI-1 Injector & Valve Cleaner

SI-1 is a concentrated package of the most powerful high-temperature detergents available. So powerful, SI-1 can clean injectors to nearly 100% efficiency in one treatment. The cleansing effect on injector deposits can raise fuel economy approximately 12% or even greater. SI-1 also protects the fuel system from rust. One bottle treats up to 100 gallons of fuel. Safe for continual use.

15 fl. oz. each	
114901	\$5.95

Power Steering Fluid

Red Line power steering fluid provides much improved wear protection and resists thermal break down. The two most common reasons for power steering component failure is contaminated fluid and thermal break down. Remember change P/S fluid and filter on an annual basis, and always use Red Line high temp power steering fluid.

98973	\$8.95
12 pack	
99228	\$99.95

Europe's Premier Lubricants & Additives

Lubro-moly is one of Europe's leading producers of automotive lubricants. They have worked with many of the major German car manufactures in the development of high quality automotive lubricants. Lubro-Moly has on file, full letters of approval for Voll-synthese motor oil from Porsche, Volkswagen, and BMW. They have also been involved in countless motorsport programs, including Mercedes Benz. The Lubro-Moly product line includes engine oils, oil additives, gasoline and diesel additives and a full line of shop lubricants and supplies. The marine division is O.E. supplier to Mercury Marine on 2 cycle petroleum products. Lubro-Moly products are of the highest quality, with track records to prove it.

Radiator Flush

Modern formulation containing a lime-stone converter and active detergents blended with oil and grease removing solvents. Restores effective heat transfer for proper cooling. Safe for all modern aluminum / plastic radiators. Use annually to reduce calcium build up.

Mos2 Antifricion Treatment

Is a concentrated MOS2 (Molybdenum disulfide) additive, which can be added to your existing motor oil, offering you the same load absorbing protection as the MOS2 antifricion oil. MOS2 is a protective barrier for older engines with marginal oil pressure. Helps protect upper valve train components, where low pressure oil starvation normally occurs. Great protection for new cars also.

99210 \$32.95

MotorProtect

Is a fully synthetic engine oil additive. It reduces friction significantly due to the high levels of EP and AW additives and friction modifiers. These special additives form a thin coating on all surfaces, forming an extremely slippery surface, especially under high pressure and temperature. The results are longer engine life. A reduction of fuel consumption and pollutant levels. Superior engine performance and quieter operation. Each 500ML. bottle will treat up to five quarts of oil. Treatment lasts up to 30,000 miles.

500ml

LM-CV Joint Grease

This product is a high quality MoS2 grease. During operation a resilient, extremely fine moly film is formed on the sliding surfaces of each component. This coating provides emergency protection long after the actual grease has broken down. We recommend repacking c/v joints every 80,000 miles, or sooner if boots show signs of damage.

3.17 oz. Tube
63401 \$4.95

Jectron Injection Cleaner

Designed to dissolve the deposits that accumulate in your car's injection system. Helps in removal of debris and deposits that obstruct the flow pattern of your injectors. This flow obstruction is the reason for power loss, poor idle and excessive fuel consumption. One can added to approximately 2-3 gallons of fuel periodically should keep the system in tip top condition. Catalytic converter safe.

Valve Clean

The removal of lead in our gasoline has forced the oil companies to substitute other chemicals to increase the fuel octane levels. Unfortunately, these chemicals are responsible for power robbing carbon deposits. Valve Clean is a super concentrated, de-carbonizer formulated especially for your German cars' injection system. Used regularly Valve Clean will remove and prevent these deposits. Each can treats up to 20 gallons. Catalytic converter safe.
